

QC Inspector II

Houma, Louisiana 70360

Axon Energy Services is a global oilfield equipment manufacturer, engineering provider, and aftermarket service company. We are looking for a QC Inspector to assure products and services meet the requirements of our quality program, engineering, and the industry regulatory standards. The ideal candidate will be able to work autonomously and responsibly.

We offer competitive compensation, an extensive benefits package, and future growth opportunities within the company. Plus, we work to maintain the best possible environment for our employees to learn and grow with the company. Axon is an Equal Opportunity Employer.

Job Duties:

- Perform basic dimensional and visual inspection of purchased materials.
- Visually, and through the use of measuring devices, inspect in-process and finished products to ensure they satisfy quality standards and industry codes and standards.
- Inspect precision-machined parts and assemblies to ensure conformance to design specifications, including tolerances, physical criteria, drawings, etc.
- Witness tests such as hydrostatic and factory acceptance tests on products to ensure compliance to company specifications.
- Work in partnership with manufacturing management to eliminate the causes of quality problems.
- Identify and label all quality defects; generate NCRs for components, procedures, etc., which do not meet applicable requirements.
- Stamp mark of approval or rejection on product and document examinations.
- Assist with the implementation and maintenance of the quality management system.

Required Skills & Experience:

- High School Diploma or equivalent and 2 to 5 years quality control experience.
- Must have **Non-Destructive Testing certification**.
- Must be able to read an **OD micrometer** and **ITD gauge**.
- Must be able to perform hardness testing, especially Rockwell and Brinell methods.
- Must be able to visually inspect weld quality.
- Experience with **BOP** and **gate valve** manufacturing preferred.
