

# Type 50 Flex Packers

AXON's Type 50 Flex Packers deliver cost-effective sealing solutions for various pipe sizes when utilizing standard ram blocks. Extra rams for variable bore sealing are unnecessary, as our flex packers are engineered to effectively close and seal pipe diameters ranging from 2-7/8" to 2-3/8". In addition to ease of maintenance in AXON's Type 50 BOPs, these flex packers feature identical footprints with other leading manufacturers' ram blocks, allowing for easy interchangeability within your existing fleets. Furthermore, Type 50 Flex Packers include an innovative, interlocking plate that minimizes extrusion gaps across intended pipe ranges.

## FEATURES / BENEFITS

### Product Description: Part Numbers

- Ram Block Assembly: 90600-14-51
- Ram Block: 81510-08-01
- Flexpacker: 81688-01-51
- Top Seal: 81590-01-51

### Product Specifications

- Engineered for AXON Type 50 BOPs, as well as other major brands in equivalent sizes
- Currently available in 7" 3,000, 5,000 and 10,000 psi
- Pipe range: 2-7/8" to 2-3/8"
- Additional types/sizes available upon request

### Design Advantages

- Versatile ram packers seal over multiple pipe sizes, resulting in lower operating costs (compared to added cost of special rams for variable bore sealing)
- Tested to AXON's stringent engineering and quality requirements, including API 16A standards and design validation tests
- Superior seal achieved with innovative plate design
